Bezzirk – Photo Sharing App

**Domain:** Social Networking  
**Technology:** iOS, Android, PHP, PostgreSQL  
**Place of client:** TN, USA  
**Description:** Bezzirk is the new social photo sharing application. Bezzirk instantly brings a world of photos to your fingertips. You can share everything - from shameless selfies to lavish landscapes. Breakthrough features allow you to upload multiple pictures, apply in-house filters, and post immediately. Main features are - Multiple Picture Upload, Polls, and Ratings. Bezzirk allows you to post pictures without cropping! Share with your friends all what you want them to see.

Available on: 📲 Android 📱 iPhone

Lendstar

**Domain:** Social Networking  
**Technology:** Objective C, Xcode  
**Place of client:** Germany  
**Description:** Lendstar is a social lending app that helps you to lend money to your pals or other people you trust – quickly, easily and securely. You have a wish you really want to satisfy, but empty pockets? Forget the expensive credit card or payday loan. Instead borrow the money for the moment from your friends or family.

Available on: 📲 Android 📱 iPhone

VConnect

**Domain:** B2B or Business Listing  
**Technology:** iOS, Android, Blackberry, .NET, MS-SQL  
**Place of client:** Lagos, Nigeria  
**Description:** VConnect is the largest local search engine and Information Services provider in Nigeria. VConnect bridges the gap between information seeker and businesses by providing comprehensive information about businesses, products and services. Finding useful & relevant Information has always been a difficult task; VConnect helps people to find information about products, services or companies available in its portal. More than 700,000 businesses are listed on VConnect.
**Internet of Things**

The vision of the Internet of Things has evolved due to a convergence of multiple technologies, ranging from wireless communication to the Internet and from embedded systems to micro-electromechanical systems. The traditional fields of embedded systems, wireless sensor networks, control systems, automation (including home and building automation), and others, all have contributions to enable the Internet of Things (IoT). We are excited to share CDN's contribution to the IoT!

**Watch + GPS + Bluetooth + iPhone**
Handheld digital watch with GPS & Bluetooth connectivity, integrated with iPhone mobile app, providing bi-directional communication and control, to offer real-time call alerts, calendar notifications.

**Hardware Lock + GPS + Bluetooth + iPhone**
Real-time controls of a smart bike lock hardware, with alarm security, GPS, and keyless unlocking via an iPhone app.

**Gaming Controller + Motors + Pressure Sensor + iPhone**
Advanced Gaming Remote Controller hardware including rotation motors, pressure sensors, and vibration controls, all integrated seamlessly with an iPhone mobile app.

**Fluid Dispenser + Pumps + Mixers + Wireless + Desktop App**
Industrial Fluid Dispensing control via desktop-based application controlling giant mechanical pumps, mixers, and wireless printers all integrated to automate the production and delivery of an industrial fluid product.

**Car Parts + Light Sensors + Spectrum Meter + iOS + Android App**
Quality Inspection mobile app for one of the ‘leading’ global car manufacturer, integration with light sensors, spectrum meters and iOS + Android Mobile apps to benchmark the quality and testing of different car parts/components.

**E-Chat**

**Domain:** Enterprise

**Technology:** iPhone, Android, Objective-C, Java, iOS SDK, Android SDK, Xcode 6.0, Eclipse

**Place of client:** South Asia

**Description:** E-chat is an app for an intranet network where all the employees can connect to each other and get necessary information about the company. Below are few use cases.

1. Employees can read policies in their mobile app.
2. Employees can get all the forms like leave form in PDF format.
3. Employees can chat with each other. It can be one to one chat or group chat.
4. Employees can appreciate each other by writing a message to them or by sharing an image. All the employees can see who appreciated whom.
5. They can also create a forum for discussion.
6. HR may create a voting poll to know the preference of employees regarding anything.
7. Employees can apply for the company’s products on discount.

Available on: Apple, Android

CDN Solutions Group (India)

Augmented Reality – Social Media Sharing App

**Domain:** Social Networking  
**Technology:** Android, PHP, MySql  
**Place of client:** Asia  
**Description:** An Augmented Reality location based mobile application that enables the users to plant virtual messages, images and videos at a particular location in an augmented reality platform. Messages at any particular location can be viewed in an augmented platform through a camera application in the mobile. This application primarily aims at reviving human interaction with their immediate surroundings rather than the digital world.

Available on: 🍎  📱

University App – Location-based, community oriented mobile application

**Domain:** Social Networking  
**Technology:** Android, PHP, MySql  
**Place of client:** Ghent, Belgium AND Capetown, South Africa  
**Description:** A mobile app developed for university, which acts like a virtual notice board for a trusted community (such as university students). Any message sent is location-based: and it becomes automatically visible on a map. The app can work in a restricted mode (being available only to the community) as well as open mode (open to all). The prominent app features are Ads, Events, Broadcasts, and Announcements.

Available on: 🍎  📱

Salesforce Android Inspection Application

**Domain:** Enterprise App  
**Technology:** Salesforce SDK, Salesforce Smart Storage, Android 4.1, SQLite, Server communication  
**Place of client:** USA  
**Description:** The objective of the project is to build mobile application that improves efficiency of Insurance field Inspectors while on location at a store. This application facilitates thorough inspection of the facility, real-time documentation of the visit and quality assurance of site visits. The application functions both online and offline and includes integration with device capabilities including GPS, Camera and Photo Editing.

CDN Solutions Group (India)  
Cloud Based File Storage Platform

**Concise:** File hosting service, cloud storage, file synchronization, personal cloud, user identity and management, data storage and access, revision history, multi-user version control, encoding technology.

**Technology:** Desktop, PHP, MySQL, iOS, Android,

**Place of client:** Australia

**Description:** A file hosting platform that offers cloud based file storage system. The platform consists of cloud-based services for user identity and management, data storage, access, and management, and programmatic interfaces (APIs); clients for data access and storage on desktop and web applications for data and service management. The system enables users to upload any file to their online cloud storage account. Users may upload files manually through the web application. The system supports synchronization and sharing along with personal storage. It supports revision history, so files deleted from a folder may be recovered from any of the synced computers. The platform supports multi-user version control, enabling several users to edit and repost files without overwriting versions.

**Compatible with:** 🌐 🍎 📱

**Codigo 3.0 - Digital Signage**

**Concise:** Digital Signage, On-Hold Messaging, Interactive Kiosks, Custom Digital Signage Ads.

**Technology:** ASP.NET 2.0, AJAX 1.0, C#, F AurineFx, SQL Server 2005, AMF.NET, MSMQ, FFmpeg, SWFTools.

**Place of client:** USA

**Description:** Codigo lets you deliver media messages to your retail audience, helping to educate, entertain, and inform. With this online tool, you can manage campaigns strategically, targeting specific demographics to influence consumer behaviour and boost your marketing ROI. Codigo is about building innovative marketing tools that enable customers to make a positive impact on retail behaviour. All of the products are aimed to be user-friendly, cutting edge, and ultimately an effective and efficient way to execute marketing strategies in a digital age.

**Explore Other Web Apps**
GAS-Global Insurance Management Portal

**Concise:** Insurance, Claim Management, Accounts, Extended Warranty, Primary Warranty, Transit Insurance, PPI, Data Mining.

**Technology:** PHP, Mysql

**Place of client:** UAE

**Description:** This is a web application for managing business information: store, organize, calculate, link and share records between Company’s dealers. System can instantly provide records in order for the Company to have an overview of all it’s customers and sales activities in an easy way. Design of this system is user friendly and is made for adding Vehicle customer details and brown & white good details, also Claim management can be done with the help of this system. Client Testimonials

Android App Development for Ghent University Students

"Before hiring CDN, I was hesitant about long distance relation because of India location. But their service is FAST, immediate and reliable communication via e-mail and skype. What I liked most about them is anticipating on client's need as well as business model. Yes, I would definitely recommend CDN because their service is fast and they are flexible."

Ghent University
Dr. Koen Stroeken, Belgium

BitsBuddy Inc.

"CDN has benefited me in terms of timely deliveries for each iteration - Good quality of code - Friendly & professional support. Before hiring them I was hesitant as I was unsure about quality of app code by offshore vendors. Since my app needed to be developed iteratively, with changes needed during development phases, I was not sure how well that will work out both from time & money point of view. But I liked their flexibility in accepting changes in requirements at all stages - Honest & accurate time/cost estimation - Developer availability. I would recommend CDN developers & designers to be more proactive in providing constructive feedback & suggestions to the design & feature set of the app."

Rishi Khanna, Toronto, Canada

Web Portal + iOS + Android Mobile App Development

"I was hoping to use a domestic company. When I spoke with them, I felt more comfortable and decided to proceed. They have been very easy to work with, which is no usually the case when you are dealing with such a time differential. They are professional and expertise. CDN has delivered great products to me in a timely manner. Absolutely, I would highly recommend CDN."

BodyBoost Workouts LLC.,
Jon Sexton, Nashville, USA

TargetMusic B.V.

"I was hesitant about the uncertainty that accompanies utilizing new outside resources. Everything always looks good on paper, but reality does not always match. We now have found a reliable partner for developing iOS Applications for our platform. After initial start-up problems were brought to management attention, the issues were investigated and resolved in a very short period of time. The end result was a process working to our expectations. Yes, I would recommend CDN for companies that need technically competence and professionally developed applications. Product development, documentation and testing allow for building a solid foundation for any new application, extending its product life and reducing its support costs. We look forward to our continued partnership and hope to be expanding the scope of future applications together."
